

California Strategic Growth Council

Healthy, thriving, and resilient communities for all

WHO WE ARE

The California Strategic Growth Council (SGC) works collaboratively with public agencies, communities, and stakeholders to achieve sustainability, equity, economic prosperity, and quality of life for all. SGC also administers a suite of grant programs funded through California Climate Investments - a statewide initiative that puts billions of Cap-and-Trade dollars to work reducing greenhouse gas emissions while providing a variety of other benefits - particularly in disadvantaged communities. To date, SGC has invested over \$1.5 billion in projects that strengthen the economy, ensure social equity, and enhance environmental stewardship across the state.

“SGC is working with communities to support equitable climate solutions that directly benefit people, communities, and the future for all Californians.”

—Louise Bedsworth, Executive Director

OUR PROGRAMS

Affordable Housing and Sustainable Communities

The Affordable Housing and Sustainable Communities Program (AHSC) builds healthier communities and protects the environment by increasing the supply of affordable places to live near jobs, stores, transit, and other daily needs.

Transformative Climate Communities

The Transformative Climate Communities (TCC) Program empowers the communities most impacted by pollution to choose their own goals, strategies and projects to reduce greenhouse gas emissions and local air pollution.

Sustainable Agricultural Lands Conservation

The Sustainable Agricultural Lands Conservation (SALC) Program protects agricultural lands on the outskirts of cities and near residential neighborhoods from development.

Climate Change Research

The Climate Change Research Program invests in cross-cutting research investments that build community resilience, integrate land use and development considerations, and facilitate the transformation of California communities.

Capacity Building and Technical Assistance

The California Climate Investments Technical Assistance (TA) and Regional Climate Collaboratives (RCC) Programs help create a more equitable playing field by increasing capacity in under-resourced communities to advance climate change mitigation, adaptation, and resilience.

Health in All Policies

The Health in All Policies (HiAP) Program works with more than 20 state agencies and departments to develop innovative solutions that create healthy places to live, work, learn, and play.

We advance California's collaborative efforts to shape how and where we grow, working to achieve equitable and resilient communities and landscapes for all.
