PLANNING PROJECTS - RECOMMENDED FOR FUNDING

Project Number	Applicant	County	Project Name	Priority Population Benefits Approved	Description	Recommended Award Amount
PG01	Santa Barbara Local Agency Formation Commission	Santa Barbara	The Santa Barbara County Agriculture and Natural Resource Initiative	Yes	The development of a collaborative Memorandum of Agreement (MOA) framework between the County and its incorporated cities to guide decision-making around Spheres of Influence (SOIs) and future development. The MOA framework will clarify jurisdictional roles, establish consistent development standards and zoning guidelines, and promote smart growth strategies that protect critical agricultural lands, maintain open space, and meet regional housing needs. The overarching goal is to preserve the rural character of the county while ensuring sustainable growth. To support the process, the LAFCO will perform a participatory spatial analysis and extensive mapping to inform policy. This analysis and its results will build upon and update existing data compiled by the Conservation Blueprint.	\$500,000
PG04	County of Lake Community Development Department	Lake	Revitalizing Lake County Agriculture: Phase 1	Yes	This project will conduct a comprehensive socioeconomic and ecological analysis of Lake County agriculture. The findings will be synthesized into the State of the Agriculture report and action plan which will be designed to reinforce the agricultural element of Lake County 2050, ongoing General Plan update, and evolving Climate Adaptation Plan. Primary components: (1) broad community engagement, including outreach and partnership building at all levels, a countywide survey of the agricultural sector, stakeholder convenings, and multiple opportunities for public input; (2) mapping and economic analysis to assess the value and condition of agricultural lands and infrastructure; (3) evaluation of tools and incentives to support long-term agricultural viability and land protection; and (4) integration with ongoing County planning efforts to ensure alignment with conservation, land use, and economic development goals.	\$500,000
PG06	County of Humboldt Planning and Building Department	Humboldt	Humboldt Natural and Working Lands Carbon Stock and Management Study	Yes	The development of a Carbon Stock Inventory and Carbon Sequestration Feasibility Study to develop a better understanding of the existing and future carbon sequestration capacity in Humboldt County. This effort will create the initial understanding of carbon sequestration as a resource for the region so that future efforts can be developed and made to use carbon sequestration as an effective strategy to climate resilience. The studies will also inform the Humboldt Regional Climate Action Plan 2030 update to achieve carbon neutrality by 2045. This includes promoting the protection and enhancement of natural and working lands, including agricultural lands, through giving a value to these lands as a statewide resource to respond to climate change by estimating their carbon sequestration capacity.	\$500,000
PG07	Alameda Local Agency Formation Commission	Alameda	The Bay Area Agricultural Resiliency Collaborative Planning Project	No	The proposed plan is a continuation of a previously funded SALC planning project with Alameda LAFCO and Alameda RCD, which aims to build upon their Bay Area Regional Agricultural Plan Framework (2024), as well as the Alameda County Agricultural Resilience Project (2023) and several other regional land conservation plans in the area. This plan will create tools, strategies, and a collaborative structure that will support coordinated agricultural land conservation and stewardship for Alameda County and the other eight Bay Area Counties. Collaboration is a key component of this project, as it involves coordinating with various jurisdictions and non-profits throughout the Bay Area. The result of this project will help jurisdictions coordinate protections for farmland at risk and prioritize investments that will reduce GHG emissions and promote nature-based climate solutions.	\$500,000
